Create OAuth client ID

A client ID is used to identify a single app to Google's OAuth servers. If your app runs on multiple platforms, each will need its own client ID. See [Setting up OAuth 2.0](#) for more information. [Learn more](#) about OAuth client types.

Application type *

Web application

Name *

Web client 1

The name of your OAuth 2.0 client. This name is only used to identify the client in the console and will not be shown to end users.

📘

The domains of the URLs you add below will be automatically added to your [OAuth consent screen](#) as [authorized domains](#).

Authorized JavaScript origins

🔗

Step: OAuth client was successfully created with a unique client ID for the Entra federation.

OAuth client created

The client ID can always be accessed from Clients tab under Google Auth Platform.

OAuth access is restricted to the [test users](#) listed on your [OAuth consent screen](#)
